this is in response to your attempt to take away my ability to have Satellite Radio. I drive truck for a living and I enjoy having the ability to have the same radio station, the variety of choices and to have the ability to enjoy the NASCAR races while I am driving. I don't feel that the FCC has the right to take away this right since I pay for the service I received from XM radio and Sirius. I would respectfully urge you to REJECT NAB's Petition 04-160.

There still is a place for local stations: I do listen to them while at home. While traveling, they are a great "Safety" feature.

Thank you! I know you will vote for "Freedom" and "Safety".

May God Bless,

Tom

PS. Great Religious sermons on X-M 170!!
